MOISTURE CURE URETHANE

The Restaurant Roof Solution!

Weather Barrier Moisture Cure Urethane can eliminate the need for roof replacement and dramatically reduce your roof maintenance budget. Application can be performed without interrupting your operations. The reflective surface dramatically lowers roof temperature which has been shown to reduce cooling costs.

Weather Barrier's Advanced Moisture Cure Urethane technology allows application to a wide variety existing roof substrates, including EPDM rubber, modified bitumen, built up, metal roof systems and more.

TEN YEAR WARRANTY when applied by a certified Weather Barrier applicator. One call to Weather Barrier is all it takes for your roof problems to disappear. Call today for your free consultation.
